

ScribeIQ™

The most advanced AI scribe for PT and rehab therapy

ScribeIQ™ is Raintree's native-built AI scribe for therapy documentation. With unmatched functionality and therapy-focused design, ScribeIQ™ sets the bar compared to third-party solutions.

FEATURING:

- **AI-Powered Documentation** – Populate both complex and simple fields with an unmatched level of precision including objective exam measurements.
- **Specialized Ambient Listening** – Our transcription model identifies therapy-specific terminology with high accuracy while filtering out unrelated noise.
- **Documentation Quality Support** – Real-time feedback on documentation quality.
- **Predictive Coding** – Optimized suggestions for diagnosis and CPT codes by payor.
- **Practice Metric Insights** – Deep practice insights with suggested enhancements.
- **Fast Onboarding** – New therapists efficiently onboarded in less than 15 minutes.

ScribeIQ transformed our evaluation process – reducing evaluation completion time from 17 minutes to under 90 seconds. Their responsive, collaborative support team helped us achieve optimized templates and confidence in the platform."

— Paul Cords, PT, DPT, CIDN, COMT
Assistant Director of Clinical Services

Revolutionizing Therapy AI

When it comes to AI, deeper integration means more innovation. Raintree is the only AI-centric therapy EHR on the market, and ScribeIQ™ is just the beginning.

Learn why Raintree ScribeIQ™ is an absolute game-changer for your practice.
