

Raintree Touchpoints™ for Patient Check-in

Front office turnover is an enduring challenge in rehab therapy. Touchpoints™ reduces check-in time by 2.5 minutes per visit, creating a more efficient process for both your patients and clinical staff.

Fast-track your patient intake by removing repetitive, manual front desk tasks.

Clinical Efficiency

- Increase data accuracy with patient-entered data
- Securely automate payments
- Improve patient collections
- Natively built within Raintree

Patient Experience

- Enhanced security and privacy with an electronic check-in
- Complete forms in advance
- Quickly upload photos of insurance cards
- Dual language capabilities

Implementing self check-in kiosks in healthcare settings has been shown to:

Alleviate distractions and enhance staff efficiency by up to **15%**¹

Reduce administrative overhead by up to **35%**²

Learn how Touchpoints™ can fast-track your digital patient intake.
